

Spirit Delivery Planning:

Every project manager should consider the delivery strategy of the project deliverables as a strategic component. Every project's objective is to deliver a product that fulfils a certain need. The word "purpose" can be used to refer to a wide range of objectives, including those for a chair, a building, a translation, etc.

Delivery planning is one of the steps used in Project Spirit to finish a project and demonstrate how it was planned out in terms of timing. This delivery plan aids in comprehending the team members' workflow and project procedure.

Each individual module is given to a team member so they may showcase their efforts and contributions to the project's development.
